

Our Products Improve Your Quality Of Life

The Market Leader in Structured Water Science

Hydreva® has the most impressive patents of any product in the global structured water field. While the science of Living Water created via crystalline restructuring is not well understood, the US Patent & Trade Office does not grant patents unless the underlying science is proven. Hydreva has two foundational patents covering its path-breaking frequency embedding (US# 7473374) and energy collection methods (US# 20130328729).

Higher-Quality Water = Better Hydration

Job 1 for water is to aid cell nutrition and waste elimination. By raising the energetic state of water and promoting crystalline restructuring, Hydreva® raises water's hydration characteristics. Benefits include improved plant health, crop yields & superior hydration in human tissue using less water.

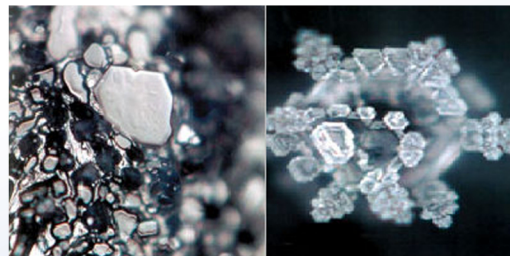

The Benefits Of Using A Hydreva Unit

- Boosts Water Energy & Frequency Naturally
- Creates Structured Living Water With Two Patented Systems & A Vortexing Chamber
- Improves Hydration & Nutrient Absorption
- Erases Negative Water Memory
- Improves Skin, Hair, Detoxification & Other Health Benefits
- Improves Oxygenation, Ph & Water Quality
- Naturally Softens & Descals Water
- Precipitates Foreign Substances Out Of Water

Hydreva's patented magnetic vortex chamber technology imitates Nature. Water flowing through rocks in a stream creates a double vortex, a dynamic which draws in energy from the surrounding environment while restructuring molecules.

Tap water (left) and same water after Hydreva treatment (right). Photos by Dr. Emoto's labs (2004)

The Hidden Messages in Water, by Dr. Masaru Emoto, reveals many amazing properties of water not yet understood by science. Hydreva's cutting-edge technology translates these insights into major water quality improvements.

Twenty years of leading-edge R&D has gone into Hydreva's revolutionary patented technology. Hydreva® was born of the breakthroughs of Nikola Tesla, Walter Russell and Victor Schauburger. Ralph Suddath, Hydreva's inventor, has been a student and teacher of water science for twenty years.

Home Water Quality

If plants and gardens love Hydreva's Energized Living Water water so much, what are the chances your body won't also love it? Imagine how much healthier all your drinking and household water might be. Install a Hydreva in your plumbing and let it condition all indoor and outdoor water.

Organic Agriculture, Lawn & Garden

Hydreva typically increases garden and crop yields 25% to 50%, while making plants healthier and more vibrant. A recent experiment on three varieties of tomato resulted in fruit count increases of 25%, 50% and 52%. The Hydreva tomatoes also were larger and grew faster. Hydreva raises water's energetic state, creating water with greatly improved hydration characteristics. Mother Nature loves Hydreva water!

Hydreva addresses the fact that most well water and all municipal water is relatively de-energized "DEAD WATER," nothing like the state of pure spring water. The combination of Hydreva's patented frequency imprinting and vortexing methods raises water's energetic state, creating a broad range of miraculous water quality improvements. Water usage can be significantly reduced while growing healthier trees, lawns and garden crops.
